AMENDMENT UNDER 37 C.F.R. §1.111

Sir:

In response to the Office Action dated September 30, 2002, please amend the above-identified application as follows:

IN THE CLAIMS:

**Please amend the claims to read as follows:**

1. (Twice Amended) A liquid-crystal display device comprising:
- a plurality of address wires formed on an insulating substrate;
  - a gate insulating film formed on said address wires;
  - a plurality of data wires, said data wires crossing said address wires;
  - an upper layer insulating film formed on said data wires, said upper layer insulating film having a smaller thickness than the gate insulating film; and
  - a picture element area comprising:
    - a transparent electrode, comprising a transparent conductive film, formed on said upper layer insulating film and surrounded by said address wires and said data wires;
    - a thin-film transistor section for selectively connecting said data wires with said transparent electrode by a gate connected to said address wires; and
    - a capacitor section comprising:
      - a first electrode formed on said gate insulating film and comprising the same conductive film as in said data wires;
